Gaël Vanhalst

Game and XR Developer

Videogames, a way to pass time or more?

Video games and its technology has an impact on all of us. It can just relax and entertain, but it can also create connections and help people cope. It can be used to teach, to inform and do more.

I have taken it as my mission to use my knowledge in video game technology to create a positive impact, through videogames and other applications.

EXPERIENCE

RESEARCH DEVELOPER PROGRAMMER

March 2018 -
December 2022

Howest: DAE Research | Kortrijk

At DAE-Research I applied video game technology in other industries to help boost innovation. My main focus in DAE Research has been VR and AR.

PROGRAMMER

December 2016 -
March 2018

Die Keure | Bruges

In Die Keure I continued working on "Kweetet.be" to help finish it. During this period I mostly continued developing the main game and worked on bug fixing. Afterwards I also helped with the start of the project "Mol en Beer".

INTERN PROGRAMMER

February 2016 -
June 2016

Die Keure | Bruges

As an intern In Die Keure I worked on "Kweetet.be". On this project I worked on the game part of the platform where I did a variety of tasks from working on the main game, to making tools, minigames and also bug fixing.

EDUCATION

DIGITAL ARTS
& ENTERTAINMENT
2012 - 2016

Howest | Kortrijk

Game development trajectory.

SCIENCE &
MATH
2010 - 2012

Sint-Aloysiuscollege | Menen
